Volcanic in origin, these islands, which are today largely excluded from the economic development of the rest of the country, have nevertheless marked the history of the area and of old Europe. Otherwise known as ‘Spice Island’, these islands were the scene of high stakes and were coveted by the main economic powers of the 16th century: English, Dutch,

Arabs, Portuguese and Chinese who contested the dominance of the place to control the precious spice trade. In the 19th century, the naturalist Alfred Russel Wallace also made it his base for exploring the more remote Indonesian regions, and contributing his research to the theory of evolution published by Darwin.

Marie, Noelle - April 2018

What to say more about this cruise than it looked like a dream. The crew was wonderful and always here for us, also not to forget the Chef.

Thank you to all the Crew!

Caroline & Paul-April 2018

If this cruise were a movie, it would be deserving of the Oscar for the best views, the best sounds, best crew, best dive, best meals, and best cruise director. Also, a big thank you to the family we met during the trip.

See you in Raja Ampat.

Arnaud-December 2018

An aerial photograph of a tropical island with a boat on the water. The image shows a small white boat with a red stripe on the water. The island is covered in lush green vegetation and has a small white building. The water is a deep blue, and the sky is a lighter blue. The overall scene is serene and beautiful.
